

GLENVALLEY PLAYSPACE RESERVE

AQL DESIGN

Yarra Ranges Council has proposed an upgradation of Glenvalley playspace reserve. Our aim is to design a community park for all ages by bringing people together to play and engage with nature. AQL idea is to converge the existing topography of the site with the creative solutions, by ensuring the comfortable circulation. The biggest challenge here was to explore the relationship between the different play elements for a community playground within this size of the land.

AQL Landscape Design works closely with clients to realise their vision for creative expression. We can assist with any project requiring a contemporary and integrated approach to two-dimensional and three-dimensional art and design.

Our team can assist with your private and public art projects through its highly recognised approach to service provision including pre-design visioning, project development, community and client engagement, varied design processes, construction, installation, compliance and project management. Clients to date include private residents and art collectors, local governments, community groups, RSL branches, schools and installation and exhibition programs.
